DETAILED ACTION

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

----- Claims 1-14 and 25-26----- have been canceled.

Allowable Subject Matter

Claims 15, 17, 20, 22 and 24 are allowed over the prior art.

The following is an examiner's statement of reasons for allowance: claims 15 and 22 are allowed because the examiner found out that applicants' argument in the Remarks filed on 8/17/06 is persuasive. Applicants argued that the reference Ito et al (US patent No. 6,683,767) teaches away from applicants' invention because it teaches a system in which the output voltage from the voltage down converter is specified by trimming information stored in non-volatile memory rather than by direct read out from the operating integrated circuit. Applicants also argued that the secondary reference Schutz. et al (US Patent No. 5,440,520) does not make up the deficiencies of the Ito et al ('767) patent. More over, applicants argued that these two references are not combinable because they are two different systems (see page 3 of the Remarks). Claims 17, 20 and 24 are dependent on claims 15 and 22 respectively and are allowed accordingly.

During further search , the examiner found out that the prior art in the record does not teach or suggest a voltage regulator for providing an

operating voltage to a integrated circuit formed on a same chip as said voltage regulator and the voltage regulator comprising a detector for measuring at least one electrical or operational parameter of the integrated circuit when the integrated circuit is operated at a nominal voltage and an evaluator to determine the desired value of the operating voltage based on the parameter(s) measured by the detector.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Loughmiller US patent No. 6,140,831 discloses a self-booting test circuit used in a semiconductor circuit to test an internal voltage of an integrated circuit (see Fig. 2).
